Practical Application and Usage of the AIAG MFMEA Manual

Implementing the AIAG MFMEA manual effectively requires a systematic approach. Here's a breakdown of the key steps:

- **Team Formation:** Assemble a multidisciplinary team with diverse expertise relevant to the product or process under analysis. This team ideally includes representatives from design, engineering, manufacturing, quality, and potentially even sales or customer service.
- **Defining the Scope:** Clearly define the system, subsystem, or process that will be the focus of the FMEA. This clarity is crucial for maintaining focus and achieving

effective results.

- **Identifying Potential Failure Modes:** The team systematically identifies potential failure modes that could occur during each step of the process or in the component parts of a product. This often involves brainstorming sessions and leveraging historical data.
- **Severity, Occurrence, and Detection (SOD) Ratings:** Each identified failure mode receives a severity rating (how severe the consequence would be), an occurrence rating (how likely the failure is to happen), and a detection rating (how likely the failure is to be detected before it reaches the customer).
- **Risk Priority Number (RPN) Calculation:** The RPN is calculated by multiplying the severity, occurrence, and detection ratings. This number serves as a measure of the risk associated with each failure mode. Higher RPN values indicate higher-priority risks.
- **Recommended Actions:** For each failure mode, the team identifies and documents recommended actions to mitigate or eliminate the risk. These actions should be specific, measurable, achievable, relevant, and time-bound (SMART).
- **Responsibility Assignment:** Each recommended action is assigned to a responsible individual or team, ensuring accountability and follow-through.
- **Action Tracking & Review:** The team regularly monitors the progress of implemented actions and updates the FMEA as needed. Regular reviews ensure that the analysis remains relevant and effective over time.
